TEJASVIN M

Python Developer | Full-Stack Development

+91 8940631803 | tejas2005tp@gmail.com | linkedin.com/in/tejju | github.com/TejasvinM | tejju-portfolio.netlify.app

Career Summary

Python Developer skilled in Django, DRF, SQL, and REST APIs, with projects spanning a Celery/Redis/Docker invoice-processing platform and responsive web interfaces using HTML, CSS, JavaScript, and Bootstrap. AI & Data Science graduate (2026) with MERN internship experience and exposure to ML and Generative AI.

Education

Sengunthar Engineering College — Namakkal, Tamil Nadu
B.Tech in Artificial Intelligence and Data Science (CGPA: 7.5/10) — *2022 – 2026*

Sri Ramakrishna Matric. Hr. Sec. School – 12th – 70% — 2022

Dhanalakshmi Srinivasan Matric. Hr. Sec. School – 10th – 87% — 2020

Technical Skills

Programming: Python, SQL, JavaScript
Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), Django, Flask, DBMS
Data & Automation: Python Automation, Data Extraction, Data Cleaning, Data Validation, Data Ingestion, ETL, Pandas, NumPy
Databases: PostgreSQL, MySQL, MS SQL Server, MongoDB
Web & Backend: RESTful APIs, DRF, , Typescript, Next.js,Express.js, HTML5, CSS3, Bootstrap
Tools: Git, GitHub, VS Code, pgAdmin, MySQL Workbench

Projects

Automated Invoice / Document Processing & Analytics Platform | *Python, Django, DRF, PostgreSQL, Celery, Redis, Docker*

- Built a Django REST Framework application for invoice PDF/image uploads, document extraction, validation, and PostgreSQL storage, with authentication, search, filtering, and pagination.
- Engineered asynchronous processing using Celery and Redis with status tracking, retries, and scheduled tasks; developed invoice analytics, optimized PostgreSQL queries, and deployed using Docker.

European Travel Organization – Relational Database Design | *PostgreSQL, MySQL, MS SQL Server*

- Designed a normalized 10-table database for 1000+ customers, tour packages, bookings, payments, hotels, and guides using 3NF, primary/foreign keys, composite keys, and junction tables.
- Developed multi-table SQL queries using joins to generate reports on bookings, payments, and travel activity while enforcing one-to-many and many-to-many relationships.

Namma Kovai – Tourism Platform | *Python, Django, DRF, PostgreSQL, Next.js, TypeScript* — Live Site

- Rebuilt a static tourism website into a full-stack application with a Django REST API, PostgreSQL, token authentication, and a Next.js front end with server-side rendering and SEO.
- Built user accounts, a shareable trip planner, and live weather and map integrations; deployed to production with CI/CD and 130+ automated API and end-to-end tests.

Internships

Generative AI Intern — Bangalore, India
Zephyr Technologies Pvt. Limited — *Jul 2025 – Aug 2025*

- Applied Python and SQL to extract, clean, validate, and automate ingestion of relational datasets for AI/ML model evaluation and improved data consistency.
- Built a traffic flow prediction model using weather data, Pandas, Random Forest, and Django; generated analytical reports on dataset quality and model-readiness.

MERN Stack Intern — Bangalore, India
Innoknowvex — *Jan 2026 – Apr 2026*

- Built responsive tourist-platform pages using HTML, CSS, JavaScript, and Bootstrap, integrating frontend components with backend services in a MERN application.
- Optimized page structure and navigation for cross-device usability while handling UI-database data flow and resolving frontend rendering and integration issues.

Training & Publications

Q-Spiders, Marathahalli — Bangalore, India
Python Full Stack Development — *2026*

International Research Journal of Computer Science (IRJCS) — March 2026
Research Publication: Integrated Advertisement Bidding and Pricing: A Machine Learning Auction Model

- DOI: 10.26562/irjcs.2026.v13i03.14

Soft Skills

College Cricket Team — Sengunthar Engineering College
Team Captain — *2024 – 2026*

- Captained the college cricket team as wicketkeeper-batsman across inter-collegiate and university-level tournaments, managing player coordination and team strategy while upholding accountability within the squad.
- Applied critical thinking under match pressure to identify and resolve in-game challenges, making real-time decisions and adapting strategy while balancing leadership responsibilities with on-field performance.
